

Yield Type	Description	Valid Yield ²	Acres	Min	Max	Comments
A	Actual Yield	> or = zero	> zero	1	10	Can be combined with up to 9 years of any yield type other than S for a minimum of 4 years. ¹
AY	Actual Yield which does NOT qualify for the APH yield adjustment election (60% T-yield substitution)	> or = zero	> zero	1	10	AY can be combined with up to 9 years of any yield type other than S for a minimum of 4 years. ¹
B	Assigned Yield for Pecans Only	> zero	= zero	4	4	Insured with less than 4 years actual records. No combination allowed. No previous approved yield.
C	P/T/V "T" Yield (simple average), OR, Determined Irrigated Yields for added Irrigated Practice.	> zero > zero	= zero =zero	1 1	4 4	1st year = 4 Cs, then, Can be succeeded by 1, 2 or 3 years of yield type A, J or P for a total of 4 years. Can be succeeded by 1, 2 or 3 years of yield type A, J, or P for a total of 4 years.
E	80% of T Yield	T Yield * 0.80	= zero	3	3/4	Must be succeeded by only 1 year of yield types A, J, or P. If yield indicator equals L can have 4 years of yield type E.
F	FCIC RSO assigned yield	> zero	= zero	1	4	Can be succeeded by 1, 2, or 3 years of yield type A, J, or P for a total of 4 years.
H	Special T Yield for new producer	T Yield * 1.10	= zero	1	4	1, 2, or 3 years reported can be succeeded by A or J yield types. H's not allowed when more than 4 years are reported and not allowed in year 7, 1998, year 8, 1999, year 9, 2000 or year 10, 2001.

I	Special T Yield for new producer	T Yield	= zero	2	4	2 or 3 years reported can be succeeded by A or J yield types. No I with 3 A's. I's not allowed when more than 4 years are reported.
J	Temporary Actual Yield	> or = zero	> zero	1	1	Can only be in year 10 when year 10 equals current year minus 1, except crops with a lag year, current year minus 2. Must be preceded by 3 to 9 years of any other yield type other than S for a minimum of 4 years. ¹
JY	Temporary Actual Yield which does NOT qualify for the APH yield adjustment election (60% T-yield substitution)	> or = zero	> zero	1	1	JY can only be in year 10 when year 10 equals current year minus 1, except crops with a lag year, current year minus 2. Must be preceded by 3 to 9 years of any other yield type other than "S" for a minimum of 4 years. ¹
K	Personal Transition Yield (PTY) ONLY applicable to crops, with a 6/30/00 contract change date in 5 Montana counties	Personal Transitional Yield (T Yield)	= zero	1	4	Can be succeeded by 0/1/2/3 years of yield type A, J or P for a total of 4 years, if yield indicator = K. If 4 Ks are used, the yield = 100% of the T yield (PTY).
L	A special yield if the database was established using the approved APH yield from a reference unit	Approved yield = Approved yield from reference unit	= zero	1	4	Can be succeeded by 1, 2 or 3 years of yield type A, J, or P for a total of 4 years.
N	90% of T Yield	T Yield * 0.90	= zero	2	2/3/4	Can be succeeded by 1/2/3 years with yield types of A, J, or P for a total of 4 years. If yield indicator equals L can have 3 years of N with 1 year of yield types A, J, or P.
P	75% of previous approved yield	Previous approved yield * 0.75 (round)	> zero	1	10	Previous approved yield required for P. Can be combined with up to 9 years of any yield type other than S for a minimum of 4 years. ¹

PY	75% of previous approved yield which does NOT qualify for the APH yield adjustment election (60% T-yield substitution)	Previous approved yield * 0.75 (round)	> zero	1	10	Previous approved yield required for PY. Can be combined with up to 9 years of any yield type other than "S" for a minimum of 4 years. ¹
R	Replicated Annual Yield (Dry Beans & Sugar Beets Only)	> or = zero	> zero	1	10	Can be combined with up to 9 years of any yield type other than S for a minimum of 4 years.
S	65% of T Yield	T Yield * 0.65	= zero	4	4	Insured with no records. No combinational allowed, other than Z. No previous approved yield, if all S's.
T	Transitional Yield Used for Added Land/PTV, that does not use a reference unit's approved yield.	T Yield	= zero	1	4	Can be succeeded by 1/2/3 years of yield type A, J, or P for a total of 4 years. If yield indicator, field 21, equals L, can have 1 or 2 years of yield type T with 2 or 3 years of yield type A, J, or P for a total of 4 years. If 4 T's are used, the yield = 100% of the Tyld.
X	80% of T Yield	T Yield * 0.80	=zero	4	4	New insured with fed production and no records. No combination allowed other than Z. Cannot have an X in 1997, 1998, 1999, 2000 or 2001. This program is not available in 1998.
Z	Zero Acres Planted (For Category C, with RSO approval only)	= zero	= zero	1	6	Can be combined with up to 4 to 9 years of any yield type. Any other yield type, cannot precede a blank.
Blank	No Yield	= zero	= zero	1	6	Can be combined with up to 4 to 9 years of any yield type. Any other yield type, cannot precede a blank.

¹ Apples & Peaches require only 5 years.² T Yield from ADMY.

Valid Yield Types by Crop Category

Category B Crops:

A, **AY**, C, E, F, H, I, J, **JY**, K, L, N, P, **PY**, R, S, T, X, Z, and Blank

H- only applicable to database years 1997 and prior

Category C Crops:

A, **AY**, B, C, E, F, J, **JY**, N, P, **PY**, S, T, Z, and Blank

Note: Annual Yields 1 - 10 must be in whole dollars for Avocados and Pecans.

Only valid yield types for California Avocados are: A, **AY**, F, P & **PY**

Only valid yield types for Florida Avocados are: A, **AY**, C, E, F, I, J, **JY**, L, N, P, **PY**, S, T, Z and Blank.

Only valid types for Pecans are: As, **AYs**, As & 1J, **As & 1JY** or 4Bs.

YIELD LIMITATION EDITS CAPS - CUPS - FLOORS

CAPS - CUPS - FLOORS DO NOT APPLY TO IP.

For INDEXED IP, Yield Limitation Flags 01 - 09, RATE YIELD Must Equal Approved Yield

Yield Limitation is calculated by line database.

If the Yield Limitation flag equals: 01

Average APH yield applies

Average APH yield falls between the cap and cup

There must be a previous approved yield

To calculate the Average APH yield:

Sum all annual yields - Divide by the number of years in the database that have
yields or acres >0

Calculate the cup: Previous approved yield * .9

Calculate the cap: Previous approved yield * 1.20

CAPS - CUPS CAPS & CUPS REQUIRE A PREVIOUS APPROVED YIELD

If Yield Limitation flag equals: 02

Capped yield applies **

The Average APH Yield is greater than the Yield Limitation Cap

To calculate the Average APH Yield:

Sum all annual yields - Divide by the number of years in the database that have
yields or acres >0

Calculate the **CAP**: Previous approved yield * 1.20

If Yield Limitation flag equals: 03

Cupped yield applies *

The Average APH Yield is less than the cupped yield.

To calculate the Average APH Yield:

Sum all annual yields - Divide by the number of years in the database that have

yields or acres >0.

Calculate the Cup: Previous approved yield * .9

*** IF YIELD LIMITATION FLAG = 03 THE TYPE 11 RECORD MUST HAVE A 'Y' IN THE PREMIUM RATE SURCHARGE FIELD (FLD. 49) AND A 5% SURCHARGE IS APPLIED TO CONTINUOUS-RATED AND NON CONTINUOUS-RATED CROPS (CATEGORY B AND THE FOLLOWING CATEGORY C CROPS: 0023, 0028, 0029, 0036, 0052, 0053, 0058, 0060, 0089, 0092, 0201, 0202, 0205, 0206, 0215, 0216, 0217, 0218, 0219, 0220, 0221, 0222, 0223, 0224, 0225, 0226, 0228, 0237, 0238**

CUPPED, CAPPED OR PREMIUM RATE SURCHARGE DO NOT APPLY TO THE FOLLOWING CROPS: 0012 (Blueberries), 0034 (Peaches) AND 0054 (Apples).

****CAPPED YIELDS NO LONGER APPLY TO CATEGORY B, APH CROPS.
SEE EXHIBIT 15-6.**

NO YIELD LIMITATION APPLIES

**FOR THIS YIELD LIMITATION FLAG THE AVERAGE APH YIELD MUST BE
GREATER THAN THE YIELD CAP OR LESS THAN THE YIELD CUP**

If the Yield Limitation flag equals: 04

Average APH yield applies

Cap/Cup do not apply

If there is a Previous Approved yield calculate the Cap/Cup

Calculate the Cup: Previous approved yield * .9

Calculate the Cap: Previous approved yield * 1.20

If there is no Previous Approved yield calculate the Average APH yield only

To calculate the Average APH Yield:

Sum all annual yields - Divide by the number of years in the database that have yields or acres >0

YIELD FLOORS

THERE MUST BE AT LEAST 1 YEAR IN THE DATABASE WITH AN ACTUAL YIELD TO QUALIFY FOR A YIELD FLOOR

A YIELD FLOOR CAN ONLY BE DETERMINED IF THERE IS A TRANSITIONAL YIELD >0

YIELD FLOORS DO NOT APPLY TO 'CAT' COVERAGE

IF THE YIELD IS FLOORED FOR CONTINUOUS-RATED CROPS, THE TYPE 11 RECORD MUST HAVE THE RATE FOR THE **RATE YIELD.**

FOR NON CONTINUOUS-RATED CROPS TYPE 11 RECORD MUST HAVE A 'Y' IN THE PREMIUM RATE SURCHARGE FIELD (FLD. 49) AND A 5% SURCHARGE IS APPLIED TO THE PREMIUM CALCULATION.

PREMIUM RATE SURCHARGE DOES NOT APPLY TO: 0012 (Blueberries), 0034 (Peaches) AND 0054 (Apples).

***YIELD FLOORS FOR CAPPED YIELDS NO LONGER APPLY TO CATEGORY B, APH CROPS. SEE EXHIBIT 15-6.**

YIELD FLOOR = TRANSITIONAL YIELD * YIELD FLOOR PERCENT

<u>YEARS OF ACTUAL YIELDS</u>	<u>YIELD FLOOR PERCENT</u>	<u>FN OPTION (NEW)*</u>	<u>FO OPTION (NEW)*</u>
1 YEAR	70%	80%	90%
2 TO 4 YEARS	75 %	85%	95%
5 OR MORE YEARS	80%	90%	100%

***These options are only available on Spring Wheat and Barley in Minnesota, North Dakota and South Dakota.**

YIELD LIMITATION EDITS

If the Yield Limitation flag equals: 05

The Yield Floor applies

The Yield Floor is greater than the Average APH yield

The Average APH yield falls between the Cap and Cup

There is a previous approved yield

There is an applicable T/yield >0

To calculate the Average APH yield:

Sum all annual yields - Divide by the number of years in the database that have yields and acres >0

Calculate the Yield Floor: T/yield * applicable percent based on the number of years of records the insured has provided.

If the Yield Limitation Flag equals: 06

Yield floor applies *

Yield Floor is greater than the capped yield

There is a previous approved yield

There is a T/yield >0

To calculate the Average APH Yield:

Sum all annual yields - Divide by the number of years in the database that have yields or acres >0

Calculate the Cap: Previous approved yield * 1.20

Calculate the Yield Floor: T/yld * applicable percent based on the number of years of actual records the insured has provided

If the Yield Limitation Flag equals: 07

Yield Floor applies

Yield Floor is greater than the cupped yield

There is a previous approved yield

There is a T/yield >0

To calculate the Average APH Yield:

Sum all annual yields - Divide by the number of years in the database that have yields or acres >0

Calculate the yield Cup: Previous approved yield * .9

Calculate the Yield Floor: $T/yld * \text{applicable percent based on the number of years of actual records the insured has provided}$

If the Yield Limitation Flag equals: 08

Yield Floor applies

The Yield Floor is greater than the Average APH Yield

There is a previous approved yield but Cap/Cup do not apply: OR

There is no Previous approved yield

There is a $T/yld > 0$

To calculate the Average APH Yield:

Sum all annual yields - Divide by the number of years in the database that have yields or acres > 0

Calculate the Yield Floor: $T/yld * \text{applicable percent based on the number of years of actual records the insured has provided}$

If the Yield Limitation Flag equals: 09

APH Adjustment Election (60% T-Yield Substitution) applies:

There is a T-yield greater than zero

At least one actual yield (A, J or P) in the database qualifies for the 60% yield substitution

All actual (unadjusted) yields in the database must be reported

For Continuous Rated crops:

The simple average of all (unadjusted) yields in the database will be calculated and will be the **Rate Yield**

60% of the T-yield will be calculated and substituted for any actual yield (A, J or P that qualifies) that is **less than** 60% of the T-yield (**any unadjusted yield that does NOT qualify for substitution will be identified with a yield type of 'AY, JY or PY'**)

The simple average of all yields in the database will be calculated again, including all substituted yields, and will be the **Approved Yield**

For NON-Continuous Rated crops:

60% of the T-yield will be calculated and substituted for any actual yield (A, J or P that qualifies) that is **less than** 60% of the T-yield (**any unadjusted yield that does NOT qualify for substitution will be identified with a yield type of 'AY, JY or PY'**)

The simple average of all yields in the database will be calculated again, including all substituted yields, and will be the **Approved Yield**

The **Rate Yield** must equal the Approved Yield

T15 EDIT FOR ADDED Practice/Type/Variety and ADDED LAND

If a perennial APH crop database contains a yield type of "C" for any annual yield field, then a special T/yield is based on a reference unit, for the crop in the county, that contains the greatest number of actual yields (A's, J's or P's). The reference unit cannot contain a "C" or "L".

The Type 15 record must contain the number of actual yields (01-10) in field 81 that is used to calculate the special T/yield.

TO CALCULATE THE VARIABLE T/YIELD FROM THE REFERENCE UNIT:

If the record with the greatest number of actual and/or assigned yields has

(1) actual or assigned yield

Then multiply the T/yield by .80

the result must equal the annual yield submitted.

(2 yrs) actual or assigned yields

Then multiply the T/y yld by .90

The result must equal the annual yield.

(3 + yrs) actual or assigned yields

Then multiply the T/yld by .100

The result must equal the annual yield

Any perennial APH crop with a yield type of "C" must have an annual yield equal to one of the above percentages. After the Special T/yield has been determined calculate the approved yield by adding all of the yields in the database by the number of years containing yield types other than "Z".

A special yield for an added P/T/V, if the database was established using the approved APH yield from a reference unit for the same P/T/V, also requires a yield type of "C". In this case, the Approved Yield must match the Approved Yield from a reference unit for the same P/T/V. Field number 81, Number of Years with Actual Yields on Reference Records, would equal zero. Field number 21, Yield Indicator would have a 'C' for this situation.

A Determined Irrigated Yield for an added Irrigated Practice also requires a yield type of "C". In this situation, there will be no edit to determine the value of each Annual Yield, however, the Annual Yields will be summed and divided by the number of yields to determine the Approved Yield. Field number 81, Number of Years with Actual Yields on Reference Records, would equal

zero. Field number 21, Yield Indicator would have a “C” for this situation.

A special yield for Added Land, if the database was established using the approved APH yield from a reference unit, requires a yield type of "L". The Approved Yield must match the Approved Yield from the reference unit. Field number 81, Number of Years with Actual Yields on Reference Records, would equal zero.

Determine the Yield Limitation flag by the following method:

If there is a previous approved yield calculate the "CAP" and "CUP":

The cup for the record = Previous Approved yield * .9

The cap for the record = Previous Approved yield * 1.20

Table results of these calculations

Calculate the yield floor

Yield floor = T/yld * applicable %
for the number of actual and/or
assigned yields in the reference unit.

(1) actual or assigned yield

Then multiply the T/yld by .70

The result must equal the approved yield if yield floor is applicable.

(2-4 yrs) actual or assigned yields

Then multiply the T/yld by .75

The result must be equal to the approved yield if the yield floor is applicable.

(5 + yrs) actual or assigned yields

Then multiply the T/yld by .80

The result must equal the approved yield if the yield floor is applicable.

Table results of yield floor calculation

Edit for correct yield limitation flag.

See M-13 yield limitation requirements.

YIELD INDICATORS

YIELD INDICATOR = A, ADDED LAND (Simple Average)

YIELD INDICATOR = AL, ADDED LAND FOR SUGARCANE WITH A LAG YEAR
(Simple Average)

YIELD INDICATOR = B, ADDED LAND, Variable T-Yield

YIELD INDICATOR = BL, ADDED LAND FOR SUGARCANE WITH A LAG YEAR,
Variable T-Yield

YIELD INDICATOR = C, DETERMINED IRRIGATED YIELD FOR ADDED IRRIGATED
PRACTICE OR A SPECIAL YIELD FOR ADDED P/T/V FROM A REFERENCE
UNIT. No edit for Annual Yields, Edit for Approved Yield.

YIELD INDICATOR = F, FCIC RSO ASSIGNED YIELD
This yield has been assigned by an RSO and cannot be validated.

YIELD INDICATOR = K, PERSONAL TRANSITIONAL YIELD (PTY, instead of T Yield)
Only applicable to 5 Montana counties. Not found on ADM.

YIELD INDICATOR = L, LAG YEAR PLANTED FOR CROP 0038

YIELD INDICATOR = M, MASTER YIELD
This yield has been assigned by someone and cannot be validated.

YIELD INDICATOR = W, TRANSITIONAL YIELD (FIELD 22) = Average of two or more
Map Area T-yields. Not found on ADM.

86 GYC Crops
90 APH Crops
41 Pecans
46 Avocado Revenue Coverage
(see perennial crop exception)

Edits:

1. Lower Level Yield Validation Threshold: (DAS Error 15072)

The record will be rejected if the approved or any annual yield exceeds the lower level yield validation threshold. After review by an Insurance Provider underwriter, yield records with approved or annual yields that exceed the lower level validation threshold but do not exceed the maximum acceptable level for the state/county/crop/type/practice may be resubmitted to DAS with the Excessive Yield Edit Bypass flag set to "1". In accordance with the SRA requirement that data submitted to DAS be accurate, resubmission of yield records with the review indicator set is considered confirmation that an appropriate underwriting review has occurred and confirmed that the yields are reasonable and accurate.

2. Maximum Acceptable Yield: (DAS Error 15073)

Insurance provider verified yield records with approved or annual yields exceeding the maximum acceptable level will not be accepted by DAS, except as authorized by RMA. In such instances, verified yield records with approved or annual yields in excess of the maximum acceptable level may be submitted to the RMA Actuarial Division (AD). Include a copy of the underwriting review and supporting documentation, as well as Insurance provider certification of the accuracy of the yield, in the submission for review. AD in conjunction with the Product Development Division (PDD) will coordinate any yield reviews and with the applicable RMA Regional Office (RO), as necessary. If the edit is determined to be too low, the limit for the state/county/crop/type/practice may be increased and the Insurance Provider notified to resubmit the affected yield records. Conversely, if a yield is determined to be unacceptable, assigned yield and related procedures will apply.

Perennial Crop Edits:**1. Maximum Acceptable Yield:** (DAS Error 15073)

For perennial crops, RMA has established only a maximum acceptable yield level. Yield records with approved or annual yields exceeding the maximum acceptable level for the crop will not be accepted unless it is determined by RMA that the maximum acceptable level is not representative for the state. After the Insurance Provider verifies that yields exceeding the maximum acceptable level are accurate, the Insurance Provider may submit the yields through the AD for review. AD, in conjunction with PDD will coordinate any yield reviews with the applicable RO as necessary. If the maximum acceptable level is determined to be too low, the limit for the state/crop may be increased and the Insurance Provider notified to resubmit affected yield records. Conversely, if a yield is determined to be unacceptable, assigned yield and related procedures will apply.

RMA, Actuarial Division, will maintain a yield limit table providing the lower level validation thresholds and maximum acceptable edit levels by Crop/State/County/Type/Practice (by Crop/State for perennial crops). The yield limit table will be provided to the reinsured companies via the Reporting Organization (RO) Server on a weekly basis for DAS edits. The lower level yield validation thresholds and maximum acceptable edit levels are for internal insurance provider use and are not to be distributed for field usage. RMA may modify the yield limit table on a state/crop/county/type/practice basis based upon acceptable company documentation of yield validity.

Yield edits and yield reporting are not applicable for the following insurance plans in the 15 Record, however, ADM validations on maximum protection is performed in the company's Acreage and Loss submissions through DAS:
